

V-ENABLE SELECTS NEW PRESIDENT AND EXPANDS FUNDING

SAMUEL L. POOLE ANNOUNCED AS NEW PRESIDENT & CEO

San Diego, February 24, 2005 – V-ENABLE, the worldwide leader in Speech-driven technology allowing users to access mobile content and applications, today announces additional funding in response to the solid progress made by V-ENABLE with the evolution of their core technology and the continued success in reaching carriers, application developers and various technology partners.

V-ENABLE mobile applications can now be found on Verizon, ALLTEL, U.S. Cellular, and Cricket. Application Developers are recognizing the value of V-ENABLE's veANYWAY technology that integrates speech into mobile applications. Verizon Information Services (VIS), a leading global information provider is incorporating V-ENABLE's technology into mobile applications allowing end-users faster, easier, and more interactive experiences.

V-ENABLE also announces a new President and CEO, Samuel L. Poole. As founder of Poole Investment Ventures (PIV), a provider of equity based funding and capital investments, Mr. Poole has vast experience in working with start-ups and early phase companies. Prior to PIV, Mr. Poole was president & CEO of Arista Knowledge Systems, a privately held business-to-business software company; President & CEO of Maxis, Inc. a publicly held interactive entertainment software company; and, President of IntelliCreations, an interactive entertainment software company.

"We are very excited about the new strategic direction and increased consumer orientation that Sam Poole brings to our organization", stated Dipanshu Sharma,

V-ENABLE Founder & CTO. "With Sam's experienced leadership skills we are excited about V-ENABLE's future growth opportunities."

Fernando Corona has chosen to leave V-Enable and pursue other interests.

###

About V-ENABLE

V-ENABLE, Inc, is the global leader in developing innovative products and solutions, using a patented speech-driven technology, to offer a faster, easier and more interactive user experience for accessing mobile content and applications. Our speech and motion technologies promise to accelerate the adoption of data, speech and video services for carriers worldwide using Java, Symbian and BREW platforms. Client/Server speech applications powered by V-ENABLE technology are available on Verizon, ALLTEL, U.S. Cellular, and Cricket. Offering standards-based solutions, V-Enable provides the application developer and carrier with maximum flexibility and extensibility of their applications or network. The company, founded in 2001, is headquartered in San Diego, CA. V-ENABLE was founded by wireless experts from Nokia, Motorola, PacketVideo and Cisco.
